

Up to 7 times

more effective at blocking heat than interior blinds or window tinting.

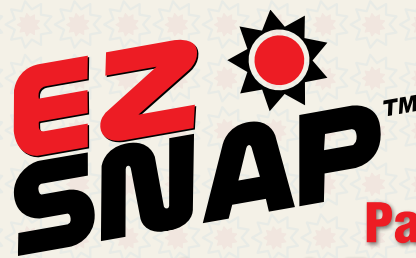

EZ Snap™ shades use a specially designed heat blocking mesh. This optical grade mesh stops up to 90% of the sun's heat without blocking your view. EZ Snap has a high UV ray protection built right in, protecting your home and cooling it at the same time. Enjoy the benefits of a cooler home, while your lower air conditioning bills pay for your new shades.

EZ Snap™ RV shades and Exterior Window Shades are so efficient at blocking the sun's heat because they are installed on the outside of the glass, effectively cooling the glass surface as well as the interior of your home or RV.

Save Energy and the Environment at the same time.

Pays for itself through Energy Savings

Benefits of EZ SNAP™

Some of the outstanding benefits of EZ Snap:

- Provides daytime privacy while still allowing natural light and visibility on the inside
- Cools the surface of the glass as well as lowers interior temperatures
- Long lasting and durable in extremely hot climates and can be left up through the winter
- Reduces glare
- Lowers or eliminates air conditioning expenses
- Prevents birds from flying into windows
- Mildew and fade resistant
- Shaded windows look cleaner than windows in the direct sunlight
- Easily cleaned with a garden hose on or off the window
- Weather and wind resistant
- Unlike window tinting, there is no risk of damaging your windows weather seal
- Is easily removed for storage, cleaning or to benefit from the sun's heat in the winter months
- Unlike tinting that can be scratched, our mesh is child and pet resistant
- Can be used on nearly any size or shape of window
- Is easily installed without specialized tools
- Adjustable EZ Snaps allow for a professional, wrinkle free install every time
